Action taken Report of Faculty Feedback
Academic Session 2024-2025

Need-Based Curriculum Design:

There is a recognized need to better align the curriculum with current industry and societal demands. To address this a curriculum review committee will be established to evaluate industry trends, emerging technologies, and evolving skill sets.

Regular interaction with different industry experts and alumni has been initiated to ensure feedback is continuously incorporated into curriculum updates.

To include modules on trending topics such as Artificial Intelligence, Sustainability, Data Analytics, and Digital Transformation across relevant programs to improve the knowledge in particular segment.

Breadth of Electives-

- In context to this departments have been encouraged to introduce new electives that reflect both domain-specific advances and interdisciplinary opportunities.
- A cross-disciplinary elective pool is being developed to allow students to choose courses from different departments, promoting broader learning. To understand the student perspective student surveys are being conducted to identify preferred elective topics and align offerings accordingly.

Opportunities for Higher Education and Academic Excellence:

- To enhance this dedicated faculty development Fund has been proposed to support participation in Ph.D. programs, national and international conferences, workshops, and certification courses.
- Institutional collaborations with reputed universities and research organizations are being pursued to provide joint research opportunities and academic partnerships and Internal awareness sessions and mentoring are being initiated to guide faculty in applying for higher studies and grants.

Awareness on the institutional policies-

- During the orientation program of faculty members, management will focus on the presentation of all approved policies of the institution. After orientation program updated bind copies of the policies supplied to individual dean office.
